

COUNCIL OF FEDERATION

OF THE FEDERAL ASSEMBLY OF THE RUSSIAN FEDERATION

WORKING GROUP FOR MONITORING THE IMPLEMENTATION OF THE FEDERAL LAW NO 261-FZ OF NOVEMBER 23, 2009 «ON POWER SAVING AND INCREASE OF ENERGY EFFICIENCY AND INTRODUCTION OF CHANGES IN THE RUSSIAN FEDERATION LEGISLATION» AND ELABORATION OF PROPOSALS TO IMPROVE THE LEGISLATION IN THE FIELD OF POWER SAVING AND ENERGY EFFICIENCY INCREASE»

SCIENTIFIC EXPERTISE COUNCIL

To the HEAD of ENTERPRISE
To Federal Executive Authority

Dear colleagues!

The problems of power saving and energy efficiency are one of the most vital for the Russian industry. The power intensity of the GDP in Russia is 2.3-2.5 times higher than in the most developed countries and twice above the world average. Using the energy-saving technologies may reduce the present consumption of power resources in the country by 40-48%. Therefore, continuous development and implementation of more advance power saving technology become a must. And Russia has a huge potential to increase its energy efficiency.

Any reform, any reconstruction requires a change in the mentality, elaboration of a new thinking. Russian mentality was formed under condition of a vast territory of the country and possession of greatest resources. Having become a part of the world economical system, Russian economy is simply forced to make a technological breakthrough or to sustain a loss with far-reaching historical consequences. Energy efficiency is the key word in the new economical policy of the country.

The Federal Law identifies energy efficiency as the «implementation of legal, administrative, scientific, industrial, technological and economical measures aimed to increase the efficiency of using the energy resources».

In order to implement the Federal Law «On power saving and increase of energy efficiency and introduction of changes in the Russian Federation legislation», and to encourage the activity in the field of power saving in the regions of Russian Federation the «All-Russia Specialized Exhibition and Conference «POWER SAVING IN REGIONS OF RUSSIA'—2011» is planned to be held on October 25 – 27, 2011 in exhibition hall 4.1 of the Sokolniki Exhibition Center in Moscow.

The exhibition will stage the Conference of Scientific Expertise Council under the Working Group of the Council of Federation on Monitoring the Implementation of the Federal Law No 261 of November 23, 2009 «On Power Saving and Increase of Energy Efficiency and Introduction of Changes in the Russian Federation Legislation». Elaboration of proposals to improve the legislation in the field of power saving and energy efficiency increase will be conducted at the workshop «Implementation of Federal Law 261 in the Regions of Russia. Practice. Problems. Solutions».

The exhibition and the conference will be attended by the representatives of the Legislative and Executive powers, authorities of the subjects of the Russian Federation, power industry specialists, scientists from the leading research and educational institutions, non-commercial organizations, representatives of construction, erection and design enterprises, foreign companies.

You are invited to participate in the Exhibition and Conference.

Mr. L. Ju. Roketsky,
Chairman, Scientific Expertise Council
